

**Monthly seminar**  
**INA – MATRICE – Programme 13-Novembre**  
**Academic year: 2017-2018**

Following the 13 November 2015 Paris terror attacks, a vast 12-year transdisciplinary research program was launched with the support of the SPGI, Secrétariat général pour l'investissement (formerly Commissariat Général à l'Investissement, CGI) and the ANR. Scientifically supervised by CNRS and INSERM and administratively by HESAM University, it has thirty-one partners. The core of the program is the follow-up of a cohort of approximately 1000 people who were interviewed in 2016 and will be interviewed in 2018, 2021 and 2026, while biomedical research, involving 200 of them, will provide a better understanding of post-traumatic stress disorder and resilience. Several other studies are also being carried out, with one objective in mind: to better understand the relationship between individual and collective memory of a traumatic event.

Already a partner of Equipex MATRICE, INA and ECPAD (Établissement de Communication et de Production Audiovisuelle de la Défense) play a key role in the audiovisual recording of all these volunteers. It is therefore only logical that the year 2017-2018 should be fully devoted to a presentation of the challenges and initial results of the 13-November programme led by neuropsychologist Francis Eustache and historian Denis Peschanski.

As in previous years, the INA-MATRICE-Programme 13-Novembre seminar will be led by Agnès Magnien ([amagnien@ina.fr](mailto:amagnien@ina.fr)) and Denis Peschanski ([denis.peschanski@cnrs.fr](mailto:denis.peschanski@cnrs.fr))
