

Monthly seminar
INA – MATRICE – Programme 13-Novembre
Academic year : 2018-2019

Location : INA, 103 rue de Grenelle, 75007 Paris

Following the 13 November 2015 Paris terror attacks, a vast 12-year transdisciplinary research program was launched with the support of the SPGI, Secrétariat général pour l'investissement (formerly Commissariat Général à l'Investissement, CGI) and the ANR. Scientifically supervised by CNRS and INSERM and administratively by HESAM University, it has thirty-one partners. The core of the program is the follow-up of a cohort of approximately 1000 people who were interviewed in 2016, 2018 and will be interviewed in 2021 and 2026, while biomedical research, involving 200 of them, will provide a better understanding of post-traumatic stress disorder and resilience. Several other studies are also being carried out, with one objective in mind: to better understand the relationship between individual and collective memory of a traumatic event.

Already a partner of Equipex MATRICE, INA and ECPAD (Établissement de Communication et de Production Audiovisuelle de la Défense) play a key role in the audiovisual recording of all these volunteers.

The year 2018-2019 is devoted to the follow-up of the different components of the Programme and will endeavour to put this work into perspective with broader questions.

At the opening of each session, Géraldine Poels (INA) will present a selection of documentary images on the theme of the day.

The INA-MATRICE-Programme 13-Novembre seminar is led by Géraldine Poels (gpoels@ina.fr) and Denis Peschanski (denis.peschanski@cnrs.fr)
